

Subject		Market
Toyota Entune Remote Connect Immobilizer Registration after DCM Replacement		USA
Service Category	Section	
Audio/Visual/Telematics	Audio/Video	
Applicability		
Entune Remote Connect Models		

APPLICABLE VEHICLES

2018	Camry	2018	Camry HV
------	-------	------	----------

CONDITION

After the DCM (Data Communication Module) has been replaced, Toyota Entune Remote is unable to remote unlock/lock the doors or remote start the vehicle.

RECOMMENDATIONS

The DCM must be registered to the immobilizer system in order to perform these functions.

After a DCM has been replaced and DCM activation has been performed, register the DCM to the immobilizer system by referring to Procedure "H" and Procedure "I" under Immobilizer System registration.

Immobilizer system registration (to enable Start Functions) can be found in the Repair Manual link below.
