| Applicable Vehicles  |                  |                           |                   |
| 2018   | Camry            | 2018                      | Sienna            |
| 2018   | Camry HV         |                           |                   |
| CONDITION  |                  |                           |                   |
| Some customers may experience an inoperative Entune™ Apps Suite after connecting an Apple device with iOS version 11.2 or later via USB tethering. |                  |                           |                   |
| RECOMMENDATIONS<br>Advise the customer to disconnect the device from the USB and only use Bluetooth to use the<br>Entune <sup>™</sup> App suite.   |                  |                           |                   |
| Note: Scout moving maps will not be available when connecting via Bluetooth.   |                  |                           |                   |
