REF #: ICI17-022

Effective: 9/1/17

Release: 9/1/17

SUBJECT: FL724 – Third Revised Bulletin

This letter is to inform you that a third revised bulletin for Recall FL724 ICU3S Instrument Cluster Hydraulic Brake Telltale is available on DTNAConnect. Please print and use the revised bulletin for all work under FL724 from this point forward.

REVISIONS: A determination was made to change certain replacement instrument clusters. Replacement part numbers starting with "A22" (requires programming per VIN by the manufacturer) have been replaced with part numbers starting with "VDO" (no pre-programming required). If a repair has been completed with an "A22" instrument cluster, it is a good repair and may still be claimed. All replacement parts can now be stocked in the PDCs. The SRT has been revised upward. It is now 0.5 hours.

If you have questions or need further information, contact the Warranty Campaigns Department by submitting an inquiry through the WSC Link on DTNAConnect.

The information contained in this letter supercedes and supplements any related policies and procedures in any previously released bulletins, the Warranty Manual, and/or previously released letters. Failure to read or distribute this letter will not exempt addressees from compliance with the information contained herein.
