

SS 1033223 WST 4700 with Cummins engine: Hood strap wrapping around A/c pressure switch

SS 1033223 WST 4700 with Cummins engine: Hood strap wrapping around A/c pressure switch

Applicable Vehicles

WST 4700 with Cummins engine

Symptoms

A/C pressure switch broken and/or hood strap wrapped around A/C pressure switch.

Issue

The hood strap on 4700s equipped with Cummins engines is liable to be tossed about by wind entering through the grille. The strap is long enough that it able to wrap around the A/C pressure switch as it is tossed in the wind.

SS 1033223 WST 4700 with Cummins engine: Hood strap wrapping around A/c pressure switch

Solution

Wrap a spiral wrap hose protector over the strap. This will weigh the strap down, preventing it from being tossed about, as well as helping it roll off the pressure switch if it gets hooked on it.
