

Service Information

Offboard Diagnostic Information System Service (ODIS Service)

Number: VOS-17-19

Subject: Software Version Update, Enhancements and Fixes

Date: Jun. 15, 2017

Supersedes VOS-17-16 due to new diagnostic content version

The following ODIS Service software versions are available for download.

Current ODIS Service Software Versions	
Application: V4.1.3	Diagnostic Content: V2.34.3

Key Fixes and Enhancements for Diagnostic Content: V2.34.3

- The Takata Airbag Recall Campaign which required a Hotfix to complete the Campaign is resolved. Once you update your diagnostic devices to this latest Diagnostic Content V2.34.3, please delete any saved copies of the Hotfix.zip file and verify it's no longer installed in ODIS Service. Please refer to **Service Information document VOS-17-18 Takata Airbag Hotfix Installation Instructions Section 5.0** if you're unsure if the Hotfix has been removed from ODIS Service.
- The issue where the Identification and DTC Entries were not displayed when printing the GFF Function Test and Short log is now resolved.
- The ability to transmit GFF Paperless logs for the Volkswagen Atlas is resolved.

Please ensure that all diagnostic devices in workshop service are updated as soon as possible.

To identify the versions currently installed on a diagnostic device, please refer to *ODIS Service – Service Information* document title: *Online Update Guide – Section 4.0*
