Subject: ODIS Service Takata Airbag Recall Hotfix**Resolved**

Department

Date: 06.16.17

Colleagues,

On May 26th, 2017 we notified you concerning an issue with performing the Takata Airbag Recall using ODIS Diagnostic Content version **2.34.2**. At that time, we provided you a Hotfix as a temporary workaround. **We are glad to inform you this issue has been resolved.** Please update all of your ODIS diagnostic devices to ODIS Diagnostic Content version **2.34.3**. Once you update your diagnostic devices, please delete any saved copies of the Hotfix and ensure it's no longer installed in ODIS Service. Please refer to Service Information document **VOS-17-18 Takata Airbag Hotfix Installation Instructions Section 5.0** to verify the Hotfix is removed from ODIS Service.

Thank you.

Todd Nurnberger
Manager – Workshop Technology

Frank Deluca
Team Leader – Diagnostic Software Support (DTSS)
