

If the awning is stuck when it opens, you have to extend the awning out until the awning freely opens when you press the extend button. Repeat as needed.

1. Manually turn the extension control on the very back end of the awning about 10 times and operate the awning if it will extend now on its own.
2. If it does not work still, the dealer has to contact Carefree of Colorado at 303-469-3324 for warranty part & labor because the motor might have to be replaced.
