SUBJECT: 2013-2015 CX-5 – NEW MOUNTING BOLT FOR FRONT BUMPER

A newly established mounting bolt (P/N KD45-50-0Z2) has been released to provide extra durability when mounting the front bumper. Use KD45-50-0Z2 in place of 9YA5-90-602A when needed.

**NOTE:**

- This bolt is non-reusable due to the thread-locking fluid. Always use new ones when installing the front bumper.
- Tightening torque is the same as the original bolt.
