

Dear Jack Daniel's 150<sup>th</sup> Anniversary Motorcycle Owner:

Safety and quality are the highest priorities for Indian Motorcycle, and we want to make you aware of a potential quality concern, affecting fuel tank paint, on Model Year 2016 Jack Daniel's Limited Edition 150<sup>th</sup> Anniversary models.

During the paint process, the device used to mask the fuel fill port allowed clear coat to be applied where exposure to fuel vapor is possible. If this occurs, fuel vapor can get under the clear coat, causing the base coat to bubble. To ensure that we continue to deliver world class quality, Indian Motorcycle will replace all affected fuel tanks with a new tank that has been painted to factory specification using an improved masking process.

Formal Service Bulletins for this concern have been delivered to dealers. Replacement fuel tanks will be available for dealers to order immediately to ensure repairs can be made as soon as possible. **Indian Motorcycle will replace all parts at no cost to customers.** Please work with your dealer to order a new replacement tank at your earliest convenience.

We apologize for the inconvenience caused by this announcement as we work to provide world class quality.

Thank you for your continued support.

The Indian Motorcycle Team
