

Subject: MAZDA RADAR CRUISE CONTROL (MRCC) MODE SWITCH OPERATION CHANGE	M-Tips No.: MT-020/17
	Last Issued: 11/22/2017

BULLETIN NOTES

APPLICABLE MODEL(S)/VINS

2017 Mazda3 Japan built vehicles equipped with MRCC and with VINs lower than JM1 BN ***** 154745
2017 Mazda3 Mexico built vehicles equipped with MRCC and with VINs lower than 3MZ BN ***** 158289
2017 Mazda6 vehicles equipped with MRCC
2017 CX-5 vehicles equipped with MRCC
2016-2017 CX-9 vehicles equipped with MRCC

DESCRIPTION

The MODE switch operation for the Mazda Radar Cruise Control (MRCC) system has been changed as follows:

- Previous - Press the MODE switch to switch to the cruise control function.
- New - Press the MODE switch **and hold for 2 seconds** to switch to the cruise control function.

The mass production change has been implemented or will be implemented in the VIN range above depending on the model.

Even if the vehicle is built before the mass production change, when the PCM is reprogrammed using IDS version B-107.05 or later software and the calibration file is updated, the MRCC MODE switch will change to the new operation.

This change reduces unintentional MRCC mode change when pressing the MODE switch.

Note: Do not perform any repairs for this MRCC MODE switch operation change.
