Title	18MY Spare Wheel Removal - Risk of damage to air supply unit expansion chamber
Category	Chassis
Last modified	30-Nov-2017 00:00:00
Symptom	306000 Tyres/Wheels

Content

Issue: It is possible that if care is not taken when removing the spare wheel that the air supply unit (compressor) can be damaged.

Cause: There is no protection in place to stop the spare wheel contacting the expansion chamber on the compressor if care is not taken when removing the spare wheel.

Action: Where available, always use the lift assist strap when removing the wheel. If not available, please ensure caution is taken when removing the wheel to avoid any potential contact with the compressor expansion chamber.

Technicians - Please rate this SSM and provide comments so that future communications can be improved.

1 = Poor – Basic information provided – The SSM does not help me resolve the customer concern.

3 = Average – Adequate information provided – The SSM partially helps me resolve the customer concern.

5 = Excellent – All required information provided to resolve the customer concern.
