## Freedman Family 3PTA Seating DRW, C2, EFX, HDX

With increased demand to broaden the upholstery choices available on the Freedman 3PTA seats we are changing the method of ordering 3PTA seats to the one used for Commercial seats.

The Family 3PTA seating found within the data book (listed below) will be discontinued.

If you wish to quote the Freedman Family 3PTA seat, you will need to ready your quotation for a seating plan by adding your assembly by selecting B636000000. You will then select your seating style from the "Seating Upgrades" area. We have released a left side (B6379x) and right side (B6479x) version of each of these seating styles. To complete the process inside the configurator simply adjust the quantities of the styles selected. This data will allow our seating specialists to configure your seating plans and preliminary weight study for your review. Current upholstery choices and features found on the Freedman website will be available to you for use with these seats.

Once you have a valid seating plan you can contact Bob West or myself to obtain a seat package quote. Please include your approved seating plan and quote numbers, list the upholstery choices and any other features you want quoted for your seats. We will supply the seating package matrix and pricing to you and once you acknowledge acceptance we will supply a valid seat package sales code to replace the dummy assembly (B636000000) so that you can submit your quote to SAP for total bus pricing.

Below is a summary of changes that will take effect in ASIST on **03/24/2017**.

| Feature                    | Description                    | Action        |
