

Delphi DEA500 Radios

EFX & HDX

Effective April 24, 2017, our current Panasonic radio options will be discontinued and replaced by the much improved Delphi DEA510 series of radios introduced last year on the Saf-T-Liner C2.

All in house orders currently calling for the Panasonic radios will remain as ordered. Change orders for the upgraded Delphi DEA510 cannot be made on units scheduled prior to 7/10/17.

The Delphi DEA510 series is a heavy duty commercial vehicle radio designed to withstand extreme driving environments often found in School Bus applications. These new radios offer:

- Large volume/menu knob
- LED display lighting
- Six AM, twelve FM, and six weather band presets
- CD player – optional PA
- Quartz clock with alarm
- Sound quality equalizer
- Auxiliary input for easy access to portable devices
- NOAA 7-channel weather band with 24-hour weather information
- J1939 messaging offering reverse mute and speed compensated volume

The following changes will take effect in the data book and configurator on 4/24/17.

Feature	Description	Action
B2604-01-300	RADIO AM/FM WITH CD PLAYER	DISCONTINUED
