Exhaust Below Rear Bumper

Minotour

In compliance with Company policy on engine exhaust exit location, all Minotour exhausts will be routed to the rear of the bus, below the rear bumper.

This will ensure no exhaust exit is under passenger side windows.

Effective immediately option **B5708-03-000** has been discontinued and will not be required on orders to get the exhaust below rear bumper.

The exhaust below the rear bumper is now standard.
