To help differentiate engine oil leaks from other possible sources, a new white-colored fluorescent engine oil dye is available. Workshop Manual (WSM), Section 303-00 has been revised to reference the new white-colored dye. The new white fluorescent dye provides a distinct white glow to identify engine oil leaks. The new white fluorescent dye requires a pure UV diagnostic inspection lamp. The white-colored fluorescent dye and pure UV lamp are now in the Rotunda catalog. Dye and lamp part numbers. Gasoline Only dye: 1 ounce bottle 164-TP-33200601. Diesel Only dye: 8 ounce bottle: 164-TP-3320-0008. Pure UV Diagnostic inspection lamp 164-TP8695 or 164-R3748.
