**NOTE**

Procedure A will be available only when the instructions require to carry out a preliminary control to determine whether or not a vehicle needs to be updated.

**Information to the field**

Due to continuous product monitoring, Automobili Lamborghini Spa has detected a possible error in the installation of the two rear air deflectors.

**ATTENTION**

Not all the cars before VIN 9205 are included in this campaign.

**Field solution**

The instruction here in detailed describes two procedures:

- A; which concern only the control of rear deflectors as their assembly is correct
- B, which concerns checking and correcting rear air deflectors mounting correctly.

**Spare parts.**No spare parts needed.**Replaced parts management.**

Store properly and tagged the parts replaced with bar code form for their identification during Area Manager visits.

**Labour time**

- Operation A, 0.1 h.
- Operation B, 0.2 h.

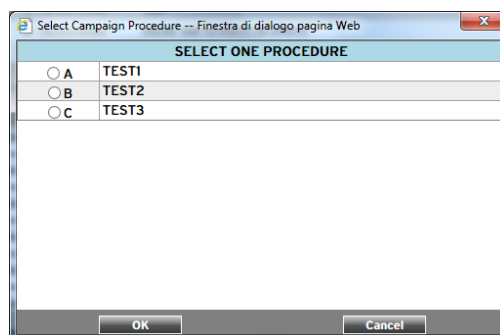

**Substituted former Bulletins.**

None.

**Warranty Claim instructions**

To claim the reimbursement log into the warranty system management on the Lamborghini Portal and consults the manual "W.Claim " available on the portal for the download .

Select the desired campaign and go on with the claim insertion, read carefully the windows message content and choose the option button corresponding to the operation performed .

On the base of the chosen option the reimbursement will be:

- OPTION A, Correct rear air deflector position. manpower 0.1 h.

- OPTION B, Correct rear air deflector position. manpower 0.2 h.

### ATTENTION!

Attach all documents produced during the vehicle visit that show evidence of the work performed such as repair order, software protocols or acquisitions...etc.; the lack of one or more of those, may deny the reimbursement.

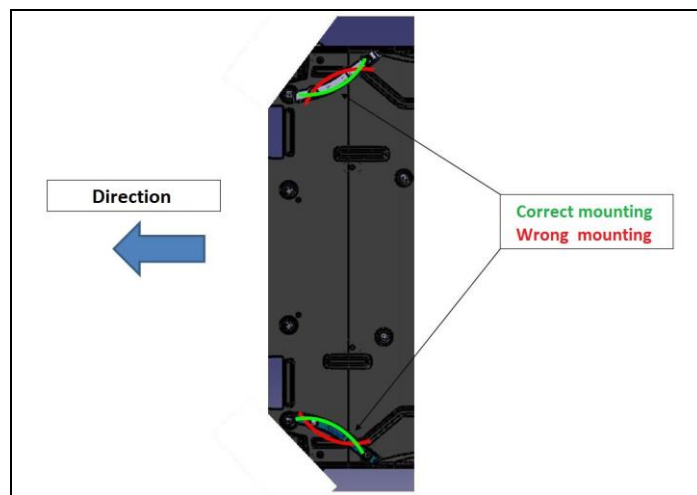

Remember to fill all data in the section "Service and Recall Campaign" in the Warranty booklet of the vehicle as shown below.

| Automobili Lamborghini S.p.A.                                                                                                                                                                                                                         |                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                       |

### A. Check correct mounting rear air deflector.

Lift the vehicle and check the correct mounting of the two rear air deflector (refer to the following figure).

### NOTE

If the installation is correct do not follow the instructions below.

### B. Dismantling/assembling the rear air deflector.

### ATTENTION

This procedure can be used on both the right and the left sides.

1. Remove the 2 mounting screws.

|                                |                                                                                                                                              |                                                                                    |
|--------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------|
| <b>L62X-</b><br><b>A.03.18</b> | <b>To:</b> Official After Sales Network<br><b>Subject:</b> Rear air deflector assembly check<br><b>Date:</b> January, 2018<br><b>Pages</b> 3 |  |
|--------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------|

2. Rotate the rear air deflector and install it in the correct position.

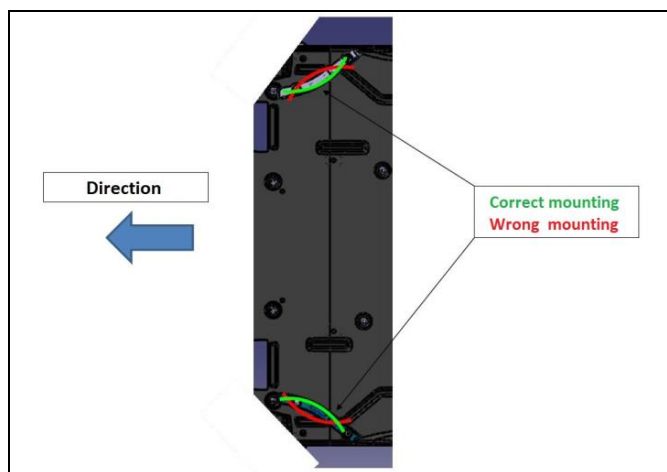

**Notes for re-installation.**

**Tighten the screws.**

Tightening torque: **6.00 Nm (4,43 lbf ft )  $\pm$  20%.**

3. Check the correct mounting of the air deflector according to the following figure.

|               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |     |
