

Service Department Wi-Fi Requirement - Password Protected

Reference: NPSB/17-083

Date: October 10, 2017

Attention: Service Directors and Service Managers

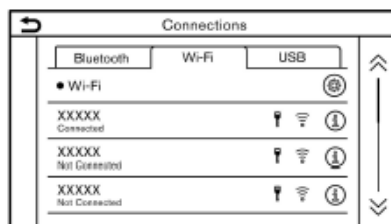

ANNOUNCEMENT

Beginning with the 2018 MY Rogue, the NissanConnect service has the ability to update its system's firmware through a Wi-Fi connection. A Wi-Fi connection can be made to the vehicle for updating NAVI map data and system software, or using online services, such as Online Search or Premium Traffic.

Workshop Wi-Fi network must be configured as WPA2 password-protected to allow connection with the 2018 MY Rogue and future equipped models. For connecting to these vehicles, please confirm with your dealer network administrator to ensure your Wi-Fi is arranged as password-protected. If you need to add password-protected, please update the login credentials on any other workshop equipment connected to the Wi-Fi network.

As an example, listed below is instructions on connecting to the Wi-Fi network through the 2018 MY Rogue screen display.

Connecting to a Wi-Fi network:

To use the Wi-Fi connection for the first time, the following connecting procedures are required.

1. Touch [Settings] on the Launch Bar.
2. Touch [Connections].
3. Touch [Wi-Fi].
4. Touch the name of the device you wish to connect.
 - 🔒: Indicates that a password is set.
 - 📶: Indicates the strength of the signal the Wi-Fi device is receiving.
5. Enter the network password and touch [OK]. The device will be connected.

For additional information on this new Wi-Fi connectivity feature, refer to the vehicle NissanConnect Owner's Manual.
