Oil Seal and Hubcap Shipping Procedure Stemco & Federal Mogul

Please review the following shipping instructions when shipping parts to Stemco and Federal Mogul.

- All parts must be tagged appropriately.
 - Each tag should include the following information
 - Trailer Serial #
 - Wheel Position
 - UTM Claim #
- When shipping multiple parts in one package, each part must have a secured tag attached.
- A copy of each claim form needs to be included in the package. Please make sure to secure the claim form to avoid contact with oil/grease
- Failure to follow shipping instructions will result in the denial of claims as the vendors cannot indentify untagged parts and UTM will not participate if directions are not followed.
- Please ensure the correct seal is sent to the correct manufacture. NO seals should be shipped to UTM.

If you have any questions regarding the information indicated, please contact Field Service Department directly at 800.423.6591

Identifying Wheel Seals Stemco & Federal Mogul

- To ensure the correct seal is sent to the correct vendor, please see below attachments from Stemco and Federal Mogul on properly identifying a wheel seal.
- All seals must be sent to the correct vendor, failure to properly identify wheel seal and send to appropriate vendor will result in denial of claim, with NO participation from UTM.
- No seals, unless specified by your Regional Manager should be sent to UTM. Failure to follow instructions will result in denial of claim.
- **NOTE:** If vendor marking cannot be identified, Stemco is a two piece seal and Federal Mogul is a one piece unitized seal.

OEM VS After-Market Stamping

307-0743 Seal-

Figure 1. Overview of 307-0743 Seal

Figure 1 above shows the location of the date code/OEM stamp on the 307-0743 seal. Below, Figure 2 depicts an OEM version of the seal. The “U” at the end of the “10B6U” date code indicates that this is an OEM part made specifically for Utility Trailers. Figure 3 shows the aftermarket version of the same part with the same date code. Note that the aftermarket variety will always end with a number whereas the OEM variety ends with a letter.

307-0723 Seal-

Figure 4. Overview of 307-0723 Seal

Figure 4 above shows the location of the date code/OEM stamp on the 307-0723 seal. The only difference in OEM/Aftermarket stamping for the two seal varieties is the location on the seal. Below, Figure 5 depicts an OEM version of the seal. The “U” at the end of the “10B6U” date code indicates that this is an OEM part made specifically for Utility Trailers. Figure 6 shows the aftermarket version of the same part with the same date code. Note that the aftermarket variety will always end with a number whereas the OEM variety ends with a letter.
