Product Upgrade Notice – 2" Tow/Accessory Receiver Cross Tube

Dear Valued Customer:

LCI has created new versions of both the 2" towing and 2" accessory receiver hitches with a lighter gauge cross tube. The new 2" towing and accessory hitches will be rated as follows:

- 2" towing hitches = 300 pound hitch weight capacity and 3,500 lb towing capacity; and
- 2" accessory hitches = 300 pound hitch weight capacity and (N/A) towing capacity.

Please note that the new towing hitch will be lighter weight while simultaneously increasing the towing capacity from 3,000 lbs to 3,500 lbs. The original version of the towing and accessory hitches utilized a 0.25" wall tube. The new versions will utilize a 7 ga. wall cross tube.

The new 2" towing and accessory receivers were tested to meet or exceed SAE J684, Table 3 parameters. A copy of the testing reports will be made available to you upon request.

If you have any questions or concerns, please do not hesitate to contact me to discuss.

Sincerely,

Trenton Miller

Chassis Product Manager

Frequently Asked Questions:

- 1. Is the original part still available for purchase?** Yes, the original 2" towing and 2" accessory receiver hitches will continue to be available for customers who want to use them.
- 2. Is the new part interchangeable with the old?** Yes, the new parts are dimensionally the same as the original versions. Both parts pass SAE requirements.
- 3. Will a new part number be required?** The new 2" towing and 2" accessory receiver hitches will be identified with new part numbers. Changing to the new 2" towing and 2" accessory receiver hitches will not require a new chassis print number.
- 4. Will the price change?** Yes, there is a cost savings to go to the new 2" towing and 2" accessory receiver hitches. For more details please contact either myself or your chassis sales representative.
