Bulletin #: 2478  
Campaign #:  
Supersedes:  
Section: 10

**Subject:** New Index format for Spare Parts Catalog and Workshop Manual

Please note that new index formats for the **Spare Parts Catalog** and **Workshop Manual** will be introduced with the first release of the **Technical Documentation** for the Portofino, available with the March 1, 2018 update.

The objective of this is to reorganise the contents of the **Spare Parts Catalogue** with a single index format for all models. The new index format introduced with the Portofino will be used for all future models. No retroactive changes will be made to the indexes for existing models.

Examples of the changes made to the **Spare Parts Catalog** are illustrated below.

- The new field “**Table Group**” (A) has been introduced in the field "Description" – Fig.1. The tables illustrate the spare parts listed in the text and are subdivided as follows:
  1. **Section A - Spare part assemblies** containing the complete engine part numbers, complete gearbox part numbers and complete engine gasket sets;
  2. **Section B** - Tables relative to engine;
  3. **Section C** - Tables relative to gearbox;
  4. **Section D** - Tables relative to mechanical systems and engine accessories;
  5. **Section E** - Tables relative to trim;
  6. **Section F** - Tables relative to electrical system.
- The new field “**Table Numbering**” (B) has been introduced in the field "Description" – Fig.1. The table numbering restarts from “01” in each table group (e.g. **B 01**; **C 01**) and may be further subdivided if necessary (e.g. **B 08.01** - CYLINDER HEADS - RH HEAD.) to limit the number of items numbered in a table and to ensure coherence across all models.

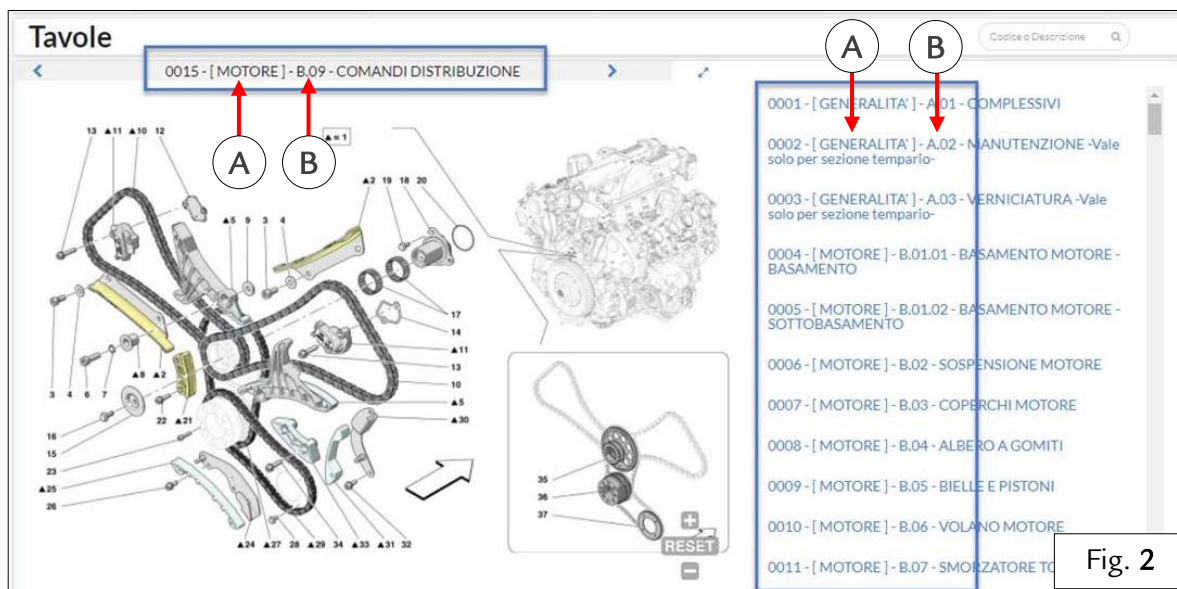

| Tavole     |                                                                      |        | Cost |
|------------|----------------------------------------------------------------------|--------|------|
| Nr. Tavola | Descrizione                                                          | Gruppo |      |
| 0001       | [GENERALITA'] - A.01 - COMPLESSIVI                                   |        |      |
| 0002       | [GENERALITA'] - A.02 - MANUTENZIONE -Vale solo per sezione tempario- |        |      |
| 0003       | [GENERALITA'] - A.03 - VERNICIATURA -Vale solo per sezione tempario- |        |      |

## Ferrari North America

The following is another example of the use of “Table Groups” (A) and “Table Numbering” (B) in the Spare Parts Catalog – Fig.2.

## Ferrari North America

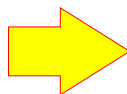

The **Workshop Manual** index format has been modified by introducing a greater number of Chapters and Sub-chapters to account for the increasing complexity of vehicles and the growing number of options available. The new index format introduced with the Portofino will be used for all future models. No retroactive changes will be made to the indexes for existing models.

The following is an example of how the index of the **Workshop Manual** has been modified - Fig.3/4

### PREVIOUS FORMAT

|                                       |
|---------------------------------------|
| ▶ 0 Generalità                        |
| ▶ A Rifornimenti e manutenzione       |
| ▼ B Motore                            |
| ▶ B1 Generalità                       |
| ▶ B2 Operazioni                       |
| ▶ B3 Impianto alimentazione motore    |
| ▶ B4 Impianto aspirazione aria motore |
| ▶ B5 Impianto lubrificazione motore   |
| ▶ B6 Impianto raffreddamento motore   |
| ▶ B7 Impianto di scarico              |
| ▶ B8 Impianto sovralimentazione       |
| ▶ C Trasmissione                      |
| ▶ D Autotelaio                        |
| ▶ E Carrozzeria                       |
| ▶ F Sistemi                           |
