Get Free Passes to the NTEA Work Truck Show

Next Week is the NTEA Work Truck Show in Indianapolis and the team at CM Truck Beds hopes to see you there. This year we will feature several new products and options that you have not seen on our beds. We hope that you will be able to stop by and see at booth number 5183. Without a doubt, there are many events in conjunction with the show that we feel are beneficial to our distributor partners. The event starts on Tuesday with the Green Truck Association's annual event in addition to the first NTEA Fleet event. The trade show itself starts on Wednesday and goes through Friday. CM Truck Beds will have our experts at many of these events in an effort to drive business to our great distribution partners.

WORK
TRUCK
SHOW.**

Product Warning Announcement

CM Truck Beds would like to ensure the safety of all of our distributors. With this in mind, please note that the airline track on our bodies installed on our ER, TM, ALER, and fold down side rails is not intended to pick the bed up. Though the rating of these tie downs is greater than the weight of the bed, the rating is based on a angular pull with the legs of the tracking that provides increased stability. When pulling directly up, the track loses significant rating.

Did you know?

CM Truck Beds is proud to be in the final stretch of completing our remodel of our plant in Madill, OK. The new plant opening is merely weeks away and should provide increased throughput of our flat deck products. Additionally, the new plant will have our TexAmor line which will significantly improve powdercoat finish on our bodies. Stay tuned for more information as the opening draws near.

Why CM?

CM Truck Beds have compression latches on all toolboxes. This helps prevent leaking in our toolboxes, the main reason that you rarely see water inside of our toolboxes. Combined with our one piece D bulb weatherstripping and our Best in Class recessed toolbox doors, you can rest assured that you have the best toolbox seal in the business.
