

COMAND Online: Various system complaints

Topic number	LI82.85-P-067590
Version	1
Function group	82.85 Navigation and Communication system (CNS, ICS, COMAND, FleetBoard)
Date	01-12-2018
Validity	Model 205 with code 531 and code 807/808 Model 253 with code 531 and code 807/808
Reason for change	Remedy file suffix adapted
Reason for block	

Complaint:

One or more of the following complaints may occur:

Navigation destinations cannot be stored.

The image on the central display (A40/8) freezes when a mobile phone is connected through Bluetooth.

Note:

Generally, no relevant faults are stored in the quick test.

Cause:

Possible COMAND Online (A26/17) software release.

Remedy:

Repeat or perform new initial startup of COMAND Online (A26/17) with Regio ECU software 09/2017 and the .ini data pool included in the attachment.

To do so, please store the .ini file on a USB flash drive in the root directory at the top level. Please make sure that the file has an .ini suffix only and not .jpg!

Insert USB flash drive into diagnostic system before starting the programming procedure (for Kit2 into Connect, for Kit3 into Tab) and start the adaptations/updates for the control unit software (online).

After the update, confirm if customer complaint has been resolved.

The software number here is E232.5, 17/25.05.
