From Auto Accessory Marketing

Subject Accessory Bike Hitch Attachment

Honda Parts Manager,

Starting on May 1, 2018, a newly revised rear view camera regulation (FMVSS 111) becomes effective. The regulation requires that rear view camera visibility requirements be met with any original equipment accessory installed.

Installation of the hitch mount bike attachment (08L14-E09-101) on 2018 model year and later vehicles would cause a non-compliance with FMVSS 111.

**Therefore, do not sell the accessory bike hitch attachment for installation on 2018 model year and later vehicles.**

We have already updated our marketing materials and parts catalog to be compliant to the revised FMVSS 111 regulation.

| Product                                                                                                | P/N           | Applicable for Sale         | Not Applicable for Sale   |
