

**\* \* TECHNICAL INFORMATION NOTICE \* \***

**DATE:** April 19, 2018  
**TO:** Mitsubishi Motors US Dealer Service and Parts Managers  
**RE:** Coolant Leaking from Hoses at CVT7 Fluid Cooler  
**TIN NO.** TIN-18-23-002

---

**AFFECTED VEHICLES:** 2014 – 2018 Mirage and 2017 – 2018 Mirage G4

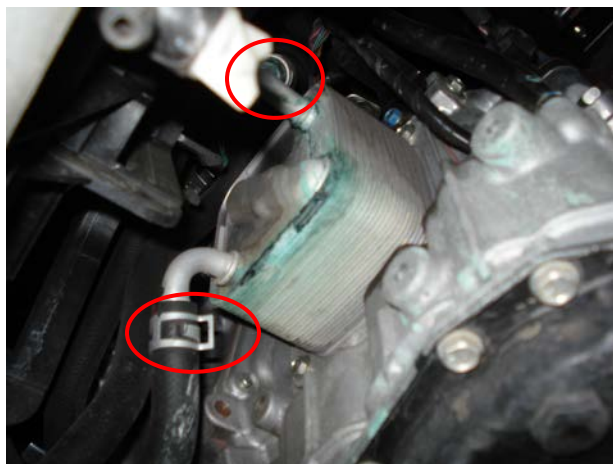

**PURPOSE**

Dealers have reported coolant leaking from the transmission cooler line hoses at the CVT7 fluid cooler (see photo below). Normal dealer repairs have been to replace the hoses and/or clamps at the affected area.

(View looking up from the bottom of the vehicle)

In order to investigate this condition further, MMNA is looking to collect 5 complete sets of CVT7 fluid coolers with the hoses and clamps undisturbed. Please do not remove the hose clamps indicated by the circled areas in the photo below. This is important since MMC needs to perform a duplication test to confirm the area of leakage.

Please open a Techline case, attach photos of the condition, and contact Techline (800-446-6064) to review the findings. Product Support will then contact the dealership to arrange return of the original parts to MMNA.
