

PRODUCT UPDATE

CAM TUBE GREASE UPDATE

LIT NO: P76028

DATE: March 2018

Hendrickson Trailer Commercial Vehicle System announces an update to the cam tube grease used on INTRAAX® and VANTRAAX® integrated suspension systems and TRLAXLE® non-integrated axles. The color of the new grease will appear different from the color of the grease used in current production. The fit, form and function of these two #2EP NLGI chassis lube products is interchangeable and mutually compatible with each other.

Current Grease (yellow color)

Alternative Grease (gray / blue color)

Beginning in March 2018, shipments may include either grease displayed above. Part numbers are unaffected by this change. Cam tubes should be lubricated in service with any #2EP NLGI chassis lube. Refer to *L974 Drum Brake Maintenance Procedures* or *L578 Preventive Maintenance Guide and Flood Service Requirements* for more details on cam tube service and maintenance.

As always, Hendrickson is committed to providing world class product and customer service. Please contact your Hendrickson sales representative or call 1-866-RIDEAIR (743-3247) to speak with a customer service representative regarding this update. Visit <http://www.hendrickson-intl.com> for more information and links to the maintenance literature.

Call Hendrickson at **330.489.0045** or **866.RIDEAIR (743.3247)** for additional information.
