

April 25, 2018

Models: MQuattroporte (M156), Ghibli (M157) and Levante (M161)

Model Year: 2014 and forward

SUBJECT: Door Modules Software Update

Dear Dealer Network,

In the event a door module (DDM, PDM, DMRL, DMRR) has to be replaced, all of the door modules must have the latest software (S/W. 17.20.0x or later) installed using the MDEVO. The software download helps reduce the number of spare parts required and ensures the compatibility between the new module installed and the remaining modules.

NOTE: Please inform the vehicle owners of the following: Any time the software is updated in the door modules on vehicles up to and including MY16, the automatic opening function of the rear view mirrors at 10 mph is deleted. The mirror opening has to be performed manually with the switch as it is on MY17 and forward vehicles.

If you have any questions, contact your Regional Aftersales Manager or Maserati Technical Support.

Thank you for your continued support and cooperation.
