

PRODUCT UPDATE

Hub Updates

LIT NO: L1098 Rev C

DATE: April 2018

Hendrickson Trailer Suspension Systems announces updates to the hub ratings on its RTR® READY-TO-ROLL® wheel-end packages. This update supersedes L1098 B Hub Ratings from February 2017.

Effective April 2018, the following updates have been made for air disc brake hubs. The Hendrickson Ductile Iron hub capacity has increased to 25,000 lbs. Additionally, the Walther HN Dura-Light Hub® is rated up to 23,000 lbs.

HUB CAPACITY for DISC APPLICATIONS (GAWR*)

Hub Material	Dura-Light Hub	Aluminum	Ductile Iron	
Supplier	Walther	ConMet	ConMet	Hendrickson
HN	23K	23K	25K	25K
HP	25K	25K	25K	25K

HUB CAPACITY for 16.5" DRUM BRAKE APPLICATIONS (GAWR*)

Hub Material	Dura-Light Hub®	Aluminum	Ductile Iron	
Supplier	Walther	ConMet	Webb	KIC
HN	22.5K	23K	25K	25K
HP	25K	25K	25K	25K

**Other components such as suspension, tires, brakes or wheels may also limit the Gross Axle Weight Rating.*

Please note that on INTRAAX® and VANTRAAX® integrated suspension systems or TRLAXLE® non-integrated axles the maximum rating may be limited by the tire, wheel, hub or brake rating when these units are assembled with reduced capacity hubs and brakes. Refer to the hub manufacturer for hub load ratings when used with offset wheels.

For applications where severe operating conditions necessitate greater suspension capacity, Hendrickson recommends using a hub that is rated to match the suspension due to the extreme operating conditions. Hendrickson's wheel-end product warranty will not apply to products in those severe-duty applications where a reduced-capacity hub is used. Refer to L707, *Application Guide*, for additional suspension application information.

As always, Hendrickson is committed to supplying innovative products that enhance the value, serviceability and lifespan of your vehicles. Please contact us at 1-866-RIDEAIR (743-3247) or visit <http://www.hendrickson-intl.com> for more information.
