March 2018

Subject: **Field Service Campaign 18M1**
GHG14 Heavy Duty Engine Platform Vocational Application Programming

Detroit Diesel Corporation (DDC) has determined that some GHG14 Heavy Duty Engine Platform engines will require programming of the MCM, ACM, CPC, and TCM to a minimum of the software and fuel maps version.

The software and fuel maps were released for service on October 17, 2016, after GHG14 vehicle production ended. Any GHG14 heavy duty engine platform engine running older software and fuel maps may need the modules reprogrammed which will prevent performance issues that may result in customer dissatisfaction.

Note that some trucks may already have been reprogrammed and will be excluded from this campaign.

Records available to us indicate that your vehicle has one of the eligible engines. Instructions for this Field Action have been sent to your local Detroit Diesel Authorized Repair Facility and the labor time required to perform this software update is approximately **0.7** hours.

Please contact a Detroit Diesel Authorized Repair Facility to arrange to have the Field Action performed. To locate an authorized facility, search online at www.detroitdiesel.com/locations/default.aspx.

This service will be completed for you at no charge, prior to **March 31, 2019**, under the provisions of this notice.

We are sorry to cause you this inconvenience; however, we have taken this action in the interest of your continued satisfaction with our products.
