Freightliner Parts Technical Bulletin

Description of Revisions: *This bulletin replaces the version dated July 2005. Part number A03-28859-XXX has been removed.*

Table 1 lists the part numbers for ordering 25-inch diameter equi-flow tanks for FLD Conventionals.

Table 2 lists the part numbers for ordering 25-inch diameter equi-flow tanks for Century Class Conventionals.

Table 3 lists the part numbers for ordering 25-inch diameter equi-flow tanks for Argosy COEs.

The first two digits of the dash number indicate the filler neck location in inches from the front tank seam to the center of the filler neck. The third digit of the dash number indicates the location of the fuel tank; -XX0 for left hand or -XX1 for right hand. Example: A03-32407-201 is a 100 gal fuel tank with 20-inch filler neck location, for the RH side.

If an electric fuel gauge is required, line note "EFG" must be noted on the fuel tank order.

25-Inch Diameter Fuel Tanks, FLD Conventional with 30 Degree Filler Necks							
Part Number	Capacity (US Gal.)	Tank Length (Inches)	Polished Finish	Instaheat Fuel Heater	Anti-Siphon Filler Neck	Drain Cable Bracket	Applicable Substitute
