## General Information

Antenna systems that provide reception for both AM/FM and CB radios may experience poor reception or static. Production is considering changing over to R. A. Miller antenna systems, which can be specifically tuned to each vehicle.

For improved reception, the R. A. Miller antennas listed in [Table 1](#) can be installed on FLD Conventional, FLD Classic XL Conventional, Business Class, Century Class Conventional, and Argosy COE vehicles.

| Vehicle Model               | R. A. Miller Antenna |                |
|-----------------------------|----------------------|----------------|
|                             | Model                | Part Number    |
| FLD Conventional            | Dual MASC            | RMI MASC1AF2X  |
| FLD Classic XL Conventional | Dual MASC            | RMI MASC1AF5X  |
| Business Class              | Single MASC          | RMI MASC1AF3SX |
| Century Class Conventional  | Dual MASC            | RMI MASC1AF1X  |
|                             | Single MASC          | RMI MASCB1AF1X |
| Argosy COE                  | Dual MASC            | RMI MASC1AF4X  |
|                             | Single MASC          | RMI MASCB1AF4X |
