

Description of Revisions: *This bulletin replaces the version dated December 2016. The phone number for Ametek customer service is revised.*

General Information

The following DTNA gauges are no longer available, but can be substituted using the parts listed in [Table 1](#).

The new gauges plug in directly and operate in the same way, but have the following differences in appearance:

- The manual rolling odometer/hourmeter has a digital readout
- An integrated LED light within the circuit board replaces the incandescent backlit bulb . The integrated LED cannot not be serviced.
- Font size and colors are different from the old gauges, but the readout parameters are the same. OEM dial face names are no longer available.

For technical questions (dealers only), please contact the Ametek Techline at 956-843-4584.

For parts availability and ordering questions, contact the DTNA Parts Expedite Call Center at 855-639-8660, extension 1.
