

XCL	SRS pyrotechnic firing circuit repairs.	A SRS firing circuit overlay harness repair kit has been released for service for all current Jaguar and Land Rover models currently in production. This repair kit should be used for all wiring damage repairs relating to the SRS firing circuits. It is important that instructions in the kit are followed exactly as well as the Workshop Manual guidelines for performing overlay harness repairs. The mandatory special tool wire strippers (418672) and the wire connector crimping tool (418116A) must be used when performing these repairs. Please refer to these SSMs for part numbers, applicable models and instruction regarding the repair kit.	SSM73844 (Jaguar) SSM73845 (Land Rover)
