## MIL On with DTC P2271?

## **AFFECTED VEHICLES**

| Year    | Model     | Trim                 |
|---------|-----------|----------------------|
| 2006-07 | Accord L4 | VP, SE, LX, EX, EX-L |
| 2005-06 | CR-V      | All                  |
| 2007-08 | Element   | All                  |
| 2006-08 | S2000     | All                  |

Is the MIL on with DTC P2271 (secondary HO2S [sensor 2] circuit signal stuck rich)? What's likely causing this is the PCM is misinterpreting the A/F sensor (sensor 1) signals, causing the PCM to think that sensor 2 is stuck rich.

To fix this issue, replace both sensors.
