Subject: Change in name of Shell Helix Ultra 5W-40 oil

Please note that, as of June 2018, Shell will be changing the commercial name of **Helix Ultra 5W-40** oil, not its formulation, on all markets.

More specifically:

- **Shell Helix Ultra 5W-40** will be called **Shell Helix Ultra Racing 5W-40** (all markets except USA)
- **Pennzoil Platinum Euro 5W-40** will be called **Pennzoil Platinum Racing 5W-40** (USA market)

The new names will be used for the first time in the fluids and liquids table for vehicles using the oil in question in the update to the Technical Documentation as of **May 2018**.

For a certain period of time, both names will be used in the fluids and lubricants table. After that, only the new names “**Shell Helix Ultra Racing 5W-40 / Pennzoil Platinum Racing 5W-40**” will be used.

- IMPORTANT -

ALWAYS check that the oil used meets all the specifications listed in the fluids and lubricants table (paragraph A1.02 of the Workshop Manual) for each model.

Thank you for your co-operation.
