Product Upgrade Notice – 2" Accessory Receiver Cross Tube

Dear Valued Customer:

LCI wanted to give notice that we have created a new 2" accessory receiver with a lighter gauge cross tube. The new 2" accessory receiver will still be rated at 300 lbs accessory hitch weight, but will weigh less than the original version. The original version used a .25" wall (3.5" x 3.5") tube and the new version will utilize a 7ga. wall (2.5" x 2.5") tube.

The new 2" accessory receiver was tested to meet or exceed SAE J684 Table 3 parameters. If you would like a copy of the test report please let me know.

If you have any questions or concerns, please do not hesitate to contact me to discuss.

Sincerely,

Trenton Miller

Chassis Product Manager

Frequently Asked Questions:

- 1. Is the original part still available for purchase?** Yes, the original 2" accessory receiver will continue to be available for customers who want to use it.
- 2. Is the new part interchangeable with the old?** Yes, however the updated version is dimensionally different than the original version. The cross tube will be updated to a 2.5" x 2.5" diameter from a 3.5" x 3.5" cross tube. Both parts pass SAE requirements.
- 3. Will a new part number be required?** The new 2" accessory receivers will be identified with new part numbers. Changing to the new 2" accessory receiver will not require a new chassis print number.
- 4. Will the price change?** Yes, there is a cost savings to go to the new 2" accessory receiver. For more details please contact either myself or your chassis sales representative.
