Applicability		
2019MY RC F, GS F MY RC F, GS F		

**APPLICABLE VEHICLES**

2019	RC F	2019	GS F
------	------	------	------

**CONDITION**

RC F and GS F models with matte paint are provided with a Matte Paint Care Guide. This manual provides details about caring for the matte clear coat applied to this vehicle. Unlike a vehicle with a normal clear coat, special care is necessary to protect the appearance of a vehicle with a matte clear coat.

Read the Matte Paint Care Guide thoroughly before washing or attempting to perform maintenance on the vehicle body to be familiar with how to prevent damage to the matte clear coat.

**RECOMMENDATIONS****WASHING VEHICLE**

**\*\*DO NOT USE AN AUTOMATED OR HIGH-PRESSURE CAR WASH\*\***

- To help avoid damage to the vehicle's paint, washing the vehicle by hand with only water is recommended. If water alone will not clean the vehicle, a diluted solution of citric acid and distilled water can be used. For full details, please refer to the Matte Paint Care Guide.

**DAILY VEHICLE STORAGE**

- Vehicle paint can deteriorate by ultraviolet rays, rain, and other natural factors. To ensure the life of the paint, it is recommended that the vehicle be stored in a location which blocks the paint from direct sunlight, rain, wind, and ground moisture.
- If a vehicle cover is used, use one with an inner liner that is fleece, non-woven, etc. as it is less likely to damage the paint. Even when using a vehicle cover, storing the vehicle in a location with a concrete floor is recommended to reduce the presence of ground moisture. For full details, please refer to the Matte Paint Care Guide.
