Description

This campaign is being issued to address a calibration update in certain ISX12N CM2380 X120B engines. This document enables authorized repair locations to calibrate the engine control module (ECM) to the latest revision.

Note : A claim with multiple ESNs is acceptable and encouraged.

Action

In order to qualify for repair under this field action, an engine:

1. will be covered Regardless of coverage status, and
2. **must** show as OPEN on QuickServe® Online for this field action.

Note : The ESN list is attached for reference.

After verifying that the engine meets the above requirements, perform the following actions:

1. Use the ECM Calibration Revision History available on QuickServe® Online to confirm the revision date of the calibration currently installed in the engine. If ECM already contains a calibration released 02-JUN-2018 or later, DO NOT calibrate the engine. No further action is needed.
2. For all engines requiring an ECM calibration, obtain a calibration via QuickServe® Online (QSOL). Enter the Engine Serial Number into QSOL, click on the Service tab, then click on Related Information, then click on Calibration Downloads and enter the requested information to obtain a Zip file to calibrate the ECM.
3. For all engines requiring an ECM calibration, calibrate the ECM as described in Procedure 019-032 in the Service Manual Bulletin 5504152 on QSOL. Provide documentation of ECM revision codes from before and after the calibration in the claims section.

Material Disposition

There are no materials involved in the field action.
