PRODUCT INFORMATION LETTER #660

Date: March 2, 2018

Subject: New 2-Piece Dust Shield for Meritor Trailer Axles

Models: All Trailer Axles with 16.5" x 7" Cam Brakes

Meritor has introduced a new 2-piece dust shield that will be compatible with our standard 5" and new 6", MTec6™, axle equipped with 16.5" x 7" cam brakes.

Effective immediately, all Meritor trailer axles equipped with or prepped for 16.5" x 7" cam brakes will be manufactured with brake spiders that have a new dust shield mounting hole location pattern. These changes will be managed as a revision change to our drawings; therefore, there will be no change to customer's top level part numbers or prices. All axle shipments with dust shields installed at our facility will be built using the new dust shield.

PRODUCT INFORMATION LETTER #660

New part numbers are available for dust shields purchased as loose kits for installation on Meritor trailer axles by the OEMs.

Meritor Trailer Axle Brake Size	Current Dust Shield Part Number	New Dust Shield Part Number
16.5" x 7"	STN JE	MPS-5132

Dust shield components will have new Meritor part numbers stamped in them as shown below. The stamped part numbers will identify the individual parts in addition to the new loose kit part number.

Dust Shield Components	Current Dust Shield	New Dust Shield
Dust Cover	PN 3264A1457	PN 3264V1634
Filler Plate	PN 15228352	PN A-3264W1635

PRODUCT INFORMATION LETTER #660

Both the current dust shield and the new 2-piece dust shield loose kit part numbers will be available for purchase from Meritor's Commercial Vehicle Aftermarket for replacement purposes. To aid in the identification of the proper dust shield kit, all axles that have "M6" stamped in their brake spiders are to be fitted with the new dust shield listed above. If the "M6" marking is not present, then the current dust shield needs to be used.
