Subject: New Spare Parts Shopping Cart Features

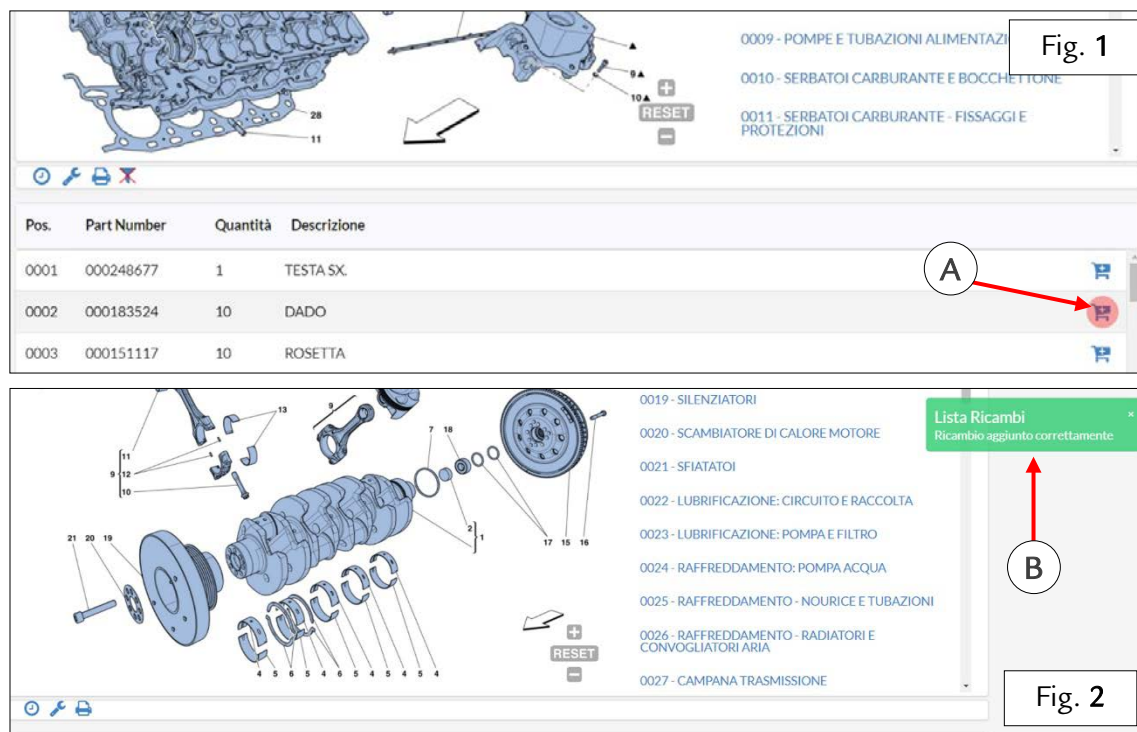

A new feature has been introduced to the Technical Documentation **Spare Parts Catalog** section which can be accessed from NewModis and used to create a **Spare Parts Order** that contains the items you are interested in purchasing.

The idea is to provide a tool that can quickly create a **Spare Parts Order** which can then be exported in Excel format to be shared or “CSV” to be imported into New Modis. The shopping cart may contain spare parts for several models at the same time and each of these has a quantity field.

Instructions on how to use the new feature are given below:

- By using the special button  (A) in the Spare Parts Catalog, you can add the relevant items to the **Shopping Cart** – Fig.1.

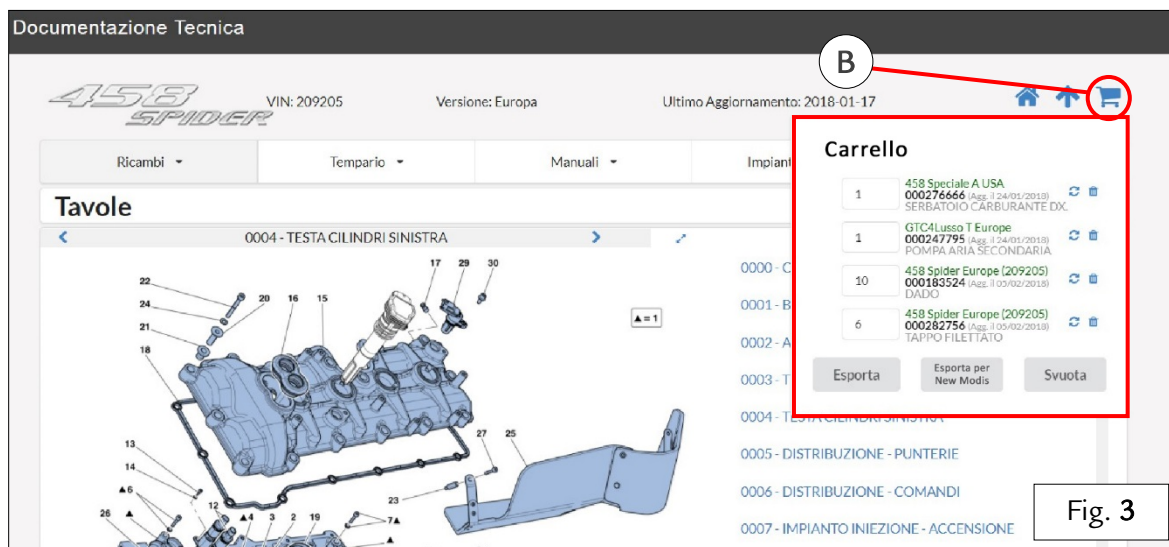

When button  is pressed, a confirmation message is displayed (B) - Fig.2.

Ferrari North America

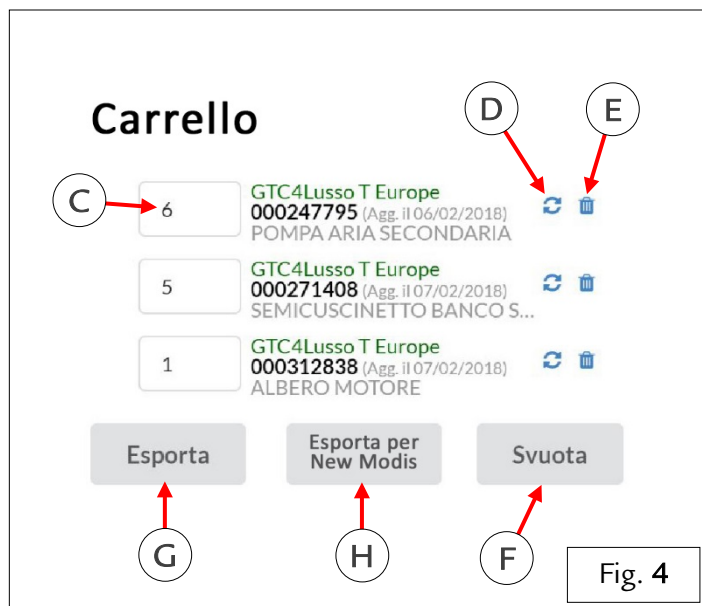

- Once you have selected all the items you want, you can display the **Shopping Cart** contents by clicking on button (B) – Fig.3.

- The main commands available in the “**Shopping Cart**” window are listed below – Fig.4:
- Display the quantity of spare parts selected. To change it, enter the desired number and press the “Refresh” button (D);
 - Update the quantity of spare parts;
 - Remove the spare part from the **Shopping Cart**;
 - Empty the **Shopping Cart**;
 - Export the **Shopping Cart** in Excel format;
 - Export the **Shopping Cart** in Excel CSV format for importing into New Modis

Inserting an order from an Excel CSV file

An order can be created by importing a **CSV** file previously generated by the **Shopping Cart**. To do this, click on the drop-down menu indicated in Fig. 5.

Ferrari North America

Click on “Import from Spare Parts Shopping Cart” to open the Import session (Fig. 6).

The Import window contains the following main information:

1. File structure: the file must have the same format displayed in the session: VIN (if required); Part Number; Quantity;
2. Order number (as displayed);
3. Click on “Search File” to select the file (.txt or .csv) from a specific folder on the PC;
4. The default separator is “;”. Users can modify it according to the separator defined in the file;
5. Click on the “Process” button to start loading the lines and perform the same checks used when manually inserting an order.

At the end of the process, the program will create a report with results for the individual lines and any additional information or errors (Fig. 7)

Chassis	Part Number	Quantity	Info
1	086085712	1,0000	Record Added. Order 890021893 - Position 1. This line contains a configured part. Please, complete the configuration.
1	086085702	1,0000	Record Added. Order 890021893 - Position 2. This line contains a configured part. Please, complete the configuration.
1	086082628	1,0000	Record Added. Order 890021893 - Position 3. This line contains a configured part. Please, complete the configuration.
209205	000246985	12,0000	Record Added. Order 890021893 - Position 4.
209205	000259156	1,0000	Record Added. Order 890021893 - Position 5.
209205	000259158	1,0000	Record Added. Order 890021893 - Position 6.
209205	000324159	2,0000	Record Added. Order 890021893 - Position 7.
000334489	RH REAR WHEEL	1,0000	Record Added. Order 890021893 - Position 8.
000334490	RH REAR WHEEL	1,0000	Record Added. Order 890021893 - Position 9.
082509529 201	CONN. ROD.	2,0000	Insertion not Allowed by File. Insert the Part Number Manually
000014985	BLUE RIM CUP -JPNS option	1,0000	The part number 000014985 has been replaced by 000109738. The item field has an invalid value in Dealer Order Entry - Lines.Part num
000230270	SEALING RING	0,0000	Quantity is Mandatory
000100015	SEALING RING	2,0000	The item field has an invalid value in Dealer Order Entry - Lines.Part number 000100015 not available !

Fig.7

The Dealer Order Entry Lines session will contain the lines that have been correctly processed. Users can modify or delete the lines inserted by the file. For configured parts, configuration must be completed before confirming the order.

Thank you for your co-operation.
