Product Change Notice - New screen door latch, latch plate and slider

Dear Valued Customer:

We are pleased to announce the addition of an improved door latch, latch plate and slider panel for all RV entry door screen doors, starting on or around Aug. 20, 2018.

The new latch (Fig. 1) has a handle on both sides, which eliminates the need to open the screen door slider panel to exit the coach. The new handle snaps over the screen door frame in an L shape for a tight fit and added durability. Installation includes two screws (Fig. 1A). A new latch plate (Fig. 2) has also been added to match the new latch.

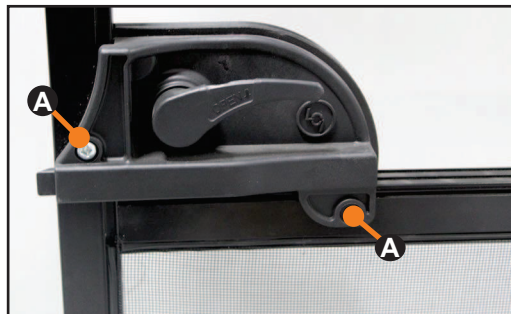

The plastic slider panel has also been updated (Fig. 3). The new slider fits with the latch and since it does not need to be used to activate the screen door handle, the plastic "bubble" (Fig. 3A) has been eliminated for improved aesthetics. The slider is available in clear or black.

The change affects all entry door screen doors, with the exception of left-hand doors. The current and new part numbers are listed on Page 2.

Fig.1

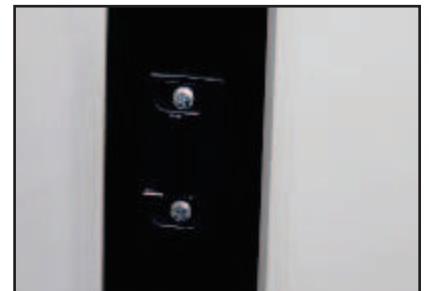

CURRENT: Screen door handle.

NEW: Screen door handle: Outside of screen door (top) and inside of screen door (bottom).

Fig.2

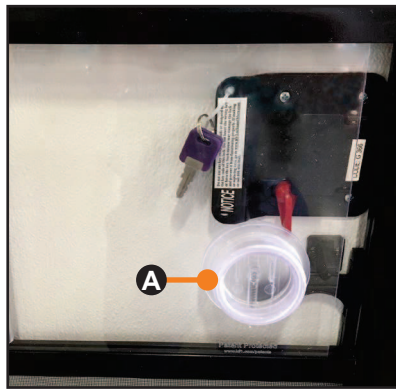

CURRENT: Latch plate.

NEW: Latch plate.
