	GROUP Electrical	MODEL 2019MY Forte (BDm)
	NUMBER PS576	DATE August 2018

TECHNICAL OPERATIONS

SUBJECT: BATTERY DEALER / CUSTOMER MODE SWITCH

This Pitstop provides information regarding a new interface related to the electronic Dealer / Customer Mode Switch setting on the new Forte (BDm).

- To activate “Customer Mode” for a PDI, hold the “OK” button on the steering wheel for three (3) seconds.

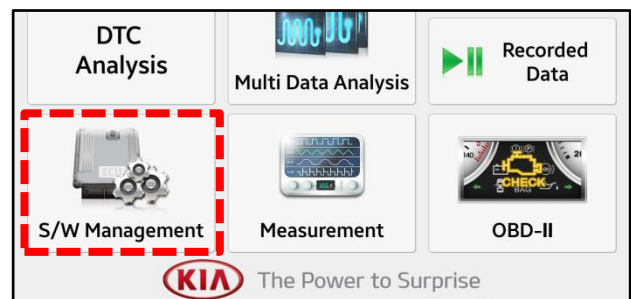

If the vehicle is in dealer inventory for more than thirty (30) days, be sure to switch the vehicle from Customer Mode to Dealer Mode. Note: “Shipping Mode” will display on the cluster.

- To switch back to “Dealer Mode” after PDI (for storage), perform the procedure below using a KDS.

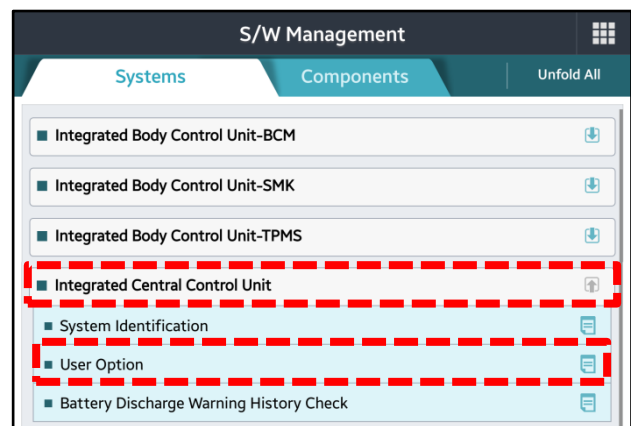

NOTE: These functions (if equipped) are disabled in Dealer Mode:

- Automatic Welcome Lights
- Key Barrel Lights
- Automatic Interior Lights
- Smart Key Detection Pulse Frequency decreased
- Parasitic decreased by ~50% (11mA to 7mA)

- With the engine OFF and ignition ON, confirm VCI-II communication and configure vehicle (AUTO VIN) and then at the KDS home screen, select **S/W Management**.

- Select **Integrated Central Control Unit** → **User Option**.

3. Select **OK** to continue.

• User Option	
Purpose	To check and allow users to configure the system.
Enable Condition	1.Engine Off 2.Ignition Switch On
Concerned Component	Body Electronic Control Modules (BCM, PSM, SCM, DDM, SJB, PSD)
Concerned DTC	-
Fail Safe	-
Etc	User can set the supported convenience function of vehicle.

OK

4. Check the box for “Quiescent Current Control” and select “Dealer Mode” from the menu below.

*** NOTICE**

Customer Mode: Used for PDI and delivery to customer.

Dealer Mode: Used while in dealer inventory. Dealer Mode can only be selected within 372 miles (600 km). After 372 miles, the vehicle will automatically switch to Customer Mode.

Factory Mode: Used only at manufacturing plant.

• [User Option]

[Data Write]

- Select the item to modify.
- Select the value in combo box.
