	2015-2017 Quest (E52)	2012-2018 Versa Sedan (N17)

APPLIED TRANSMISSION: Vehicles equipped with CVT **ONLY**

SERVICE INFORMATION

Applied vehicles equipped with a CVT have a “cap” that appears to be a fluid level gauge. This “cap” will NOT have a gauge or “dipstick”. This is normal. Do NOT replace the “cap” because it is thought to have a “dipstick”.

Whenever checking, filling, or topping off a CVT’s fluid level of an applied vehicle for any reason, use the procedure outlined in the appropriate section of the Electronic Service Manual (ESM).

Nissan Bulletins are intended for use by qualified technicians, not 'do-it-yourselfers'. Qualified technicians are properly trained individuals who have the equipment, tools, safety instruction, and know-how to do a job properly and safely. **NOTE:** If you believe that a described condition may apply to a particular vehicle, DO NOT assume that it does. See your Nissan dealer to determine if this applies to your vehicle.
