SUBJECT: **Medium Duty DD5 Aftertreatment Major Repairs**

ISSUE

Detroit™ has released a new medium duty DD5 engine into the North American trucking market. As with any new product launch, Detroit is committed to providing the best possible service and support to our customers. To assist in providing the best service and performing proper failure analysis, a major component failure on a DD5 aftertreatment with engine model number 934914(S) will require a complete aftertreatment replacement. This is not a permanent repair strategy and Detroit will alert the service network once major aftertreatment repairs can be made.

REQUIRED ACTION

A Detroit DD5 aftertreatment with damage or failure to any of the following components will require a complete aftertreatment replacement:

- Diesel Oxidation Catalyst (DOC)
- Diesel Particulate Filter (DPF)
- Selective Catalytic Reduction (SCR) Catalyst

Detroit always recommends following the latest diagnostic and repair procedures in Power Service Literature.

CONTACT INFORMATION

Please contact the Detroit™ Customer Support Center at 800-445-1980 or email csc@daimler.com if you have any questions.
