	NUMBER PS560	DATE September 2018

TECHNICAL OPERATIONS

SUBJECT: **INTEGRATED BRAKE ACTUATOR UNIT
(IBAU) HONK NOISE**

This Pitstop provides information regarding the 2017-2018MY Niro (DE P/HEV) and Optima Plug-in/Hybrid (P/HEV) vehicles, which may exhibit an intermittent “squeaking” and/or “honking” noise when applying the brakes rapidly. The ‘Integrated Brake Actuator Unit’ (IBAU) should **NOT** be replaced for this concern. An IBAU brake bleed should be performed.

- Perform the two-step ‘Active Hydraulic Boost’ (AHB) bleeding procedure by referring to the “Brake System → Brake Bleeding Procedures” chapter in the applicable Shop Manual on KGIS.

Audio Recording Example: [Brake Pedal Honk Noise](#)
