

Replacement Engine Labels MP7, MP8 and MP10 Engines

FSB 210-046, Replacement Engine Labels

(September 2018)

An Engine Information Label is provided with aftermarket replacement engines, (short blocks, exchange and basic). A few engine offerings may be utilized for more than one Regulation Period. If one of these engines needs to be changed to a different Regulation Period, these engines need to have the current Engine Information Label removed and replaced with the correct label. If an engine label needs to be replaced, dealers can order engine labels from the Parts Technical department.

In order to supply factory quality labels, all labels **MUST** be ordered via requests from Parts Technical.

To order a replacement label:

- 1 Complete the included form with the current label part number, engine serial number, vehicle identification number and a PO number. Complete the attached "Required Information" form. Attach the completed form to the E-Service case.
- 2 The label will be printed and shipped within 24 to 48 hours of receiving the E-Service case on Monday through Friday.
- 3 Your dealer account number will be billed \$50 US or \$75 CAD against your PO number as "Engine Label."

Note: Applications must be completed and ordered by the dealers only.

Engine label replacements are needed for a variety of reasons such as: engine replacement and lost or missing labels. Engine label replacements are available from 1996 to current.

Note: Engine label replacement requests must be completed and ordered by a certified MACK dealer only.

- To obtain engine label replacements, refer to "Application for Engine Emission or Vehicle Identification Labels", page 3
