UTILITY TRAILER MANUFACTURING CO.

SB-07-009A

Issue Date: June 2006

Re-Issue Date: September 11, 2018

REAR IMPACT GUARD (BUMPER) REQUIREMENTS Requesting a Replacement Bumper and/or DOT Decal

Utility trailers manufactured after January 1998 are built to certify rear bumper compliance with the Federal Regulations specified in DOT 49 CFR, Parts 571.223 and 571.224. Each guard is equipped with a label that certifies that compliance.

Replacement bumpers that may be required on trailers noted above (due to damage, for example) must be **ONLY UTM-DESIGNED AND MANUFACTURED** rear bumpers. These replacement bumpers, which are the current design horizontal and vertical members, are available through Utility's Aftermarket Division by making a request, properly filling out and submitting a Dealer Request for Replacement DOT Rear Impact Guard & Certification Label (sample, Page 2).

~~In a case where a label replacement only is required (for example, the label is illegible or missing), a new label for replacement is available through the Utility Field Service Department by making a request, properly filling out and submitting a Dealer Request for Replacement DOT Certification Label (sample, Page 3).~~ Refer to **SB-07-009B** for updated process of ordering decals (decals only – NOT guards)

WARNING! The use of a non-Utility designed and manufactured rear bumper on above noted trailers could significantly change the strength and energy-absorbing characteristics of the original bumper, thereby making the trailer non-compliant with current law. For example, Holland markets an aftermarket bumper that does not meet UTM requirements. The following warning sticker has been added by Holland to all of their replacement bumpers. UTM has no installation method or drawings for this Holland product.

Any further questions may be directed to the Field Service Department at (800) 423-6591
