Customer states:

• The power closing door latch system intermittently does not work. The door closes and latches properly otherwise.

Workshop findings:

The following DTC may be stored in driver door control module, J386 (address word 0042), front passenger door control module, J387 (address word 0052), left rear door control module, J388 (address word 00BB) or right rear door control module, J389 (address word 00BC):

• DTC B122D29 (locking unit for central locking - implausible signal)

Technical Background

The applicable door control module does not correctly identify the current state of the door lock actuator motor and the power closing feature is inadvertently disabled.

Production Solution

Not applicable.
