

CODE 6382 Unable to Update Message on Audio/Information Screen

AFFECTED VEHICLES

Year	Model	Trim
2019	RDX	ALL

If you get a vehicle with the message **CODE 6382 Unable to Update** on the audio/information screen, it means there's a problem doing an over-the-air (OTA) update. We're aware of this issue, and have it under investigation.

Until we find a solution, don't try replacing the head unit; there's nothing wrong with it. Just select **Ok** on the screen and that code will clear. But keep in mind it could come back if the vehicle gets within range of AHMOTA WiFi.
