Product Change Notice - Landing gear motor switch from white to black

Dear Valued Customer:

Please be advised that LCI's supplier of white electric landing gear motor switches (PN 145236) advised us they will not be fulfilling future orders as they are obsoleting that part.

As the result of the supplier issue, LCI will be obsoleting the electric landing gear motor/white switch kit (PN 162895) and replacing it with landing gear motor/black switch kit (271633) across the board.

The two landing gear motor/switch kits use the same motor (PN 141893). The only difference in the kits is the color of the switch: white switch (PN 145236) and black switch (PN 237337). (See Figs. 1 and 2.)

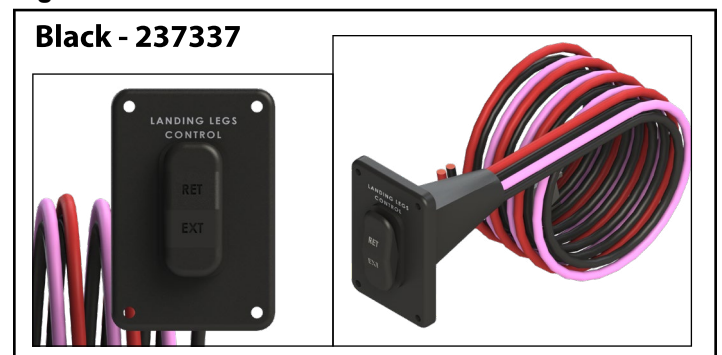

Customers should begin using kit PN 271633 on future orders of the landing gear motor/switch.

There is no change in fit, form, functionality, operation or installation associated with obsoleting the white switch. There is also no price change. The change will be made on a running basis, starting on or around Nov. 1.
