Technical Information

Date:	October 2018
Bulletin #:	2531
Campaign #:	440
Supersedes:	
Section:	1

This Technical Information is an update to the previous Technical Information 2482 of March 2018.

Subject: Sampling Engine Oil

Please note that for vehicles involved in the engine oil sampling program as indicated in Technical Bulletin **2482**, the oil must **NOT** be replaced as outlined in the **Maintenance Plan**, e.g. after one year or 12,500 miles, but only when we inform you that sampling has been completed.

Samples on vehicles that have had an oil change in **2017** or **before February 2018** provide important information which is used to develop an algorithm that calculates engine oil life. Please follow the instructions above and take a sample for these vehicles by **October 2018** and a second one by and no later than the beginning of **December 2018**.

Samples on vehicles that have had an oil change **after February 2018** are not useful for our analysis. These vehicles are considered excluded from the program and must return to the scheduled maintenance plan. Every sample on these vehicles will no longer be reimbursed under warranty.

Please find attached on page 2 of this document an updated list of the vehicles involved in the program. Vehicles which are no longer listed should be considered excluded from the program.

For information on sampling and reimbursement via the activity's **Warranty Service**, please refer to Technical Information **2482**.

Thank you for your co-operation.
